Education

2001 - 2005	Qassim University	KSA - Alqassim
	Bachelor degree in Medical laboratories	
2005 -2006	King Fahd Specialist Hospital	KSA - Buraydah
	Internship in Medical Laboratory	
	○ Grade: very good	
2007 - 2008	Colchester English Study Centre	UK - Colchester
	General English courses	
2008 May - Sep	Essex University	UK - Colchester
	English pre-sessional course for academic purposes	
2008 - 2009 Sep	Essex University	UK - Colchester
	MSc degree in Molecular Medicine	
	Thesis title: Molecular Characterization of Cytotoxic T-Lymphocyte Antigen 4 (CTLA-4) receptor in human leukemic monocytes	
	○ Grade: Merit	
2010 - 2013	Cardiff University	UK - Cardiff
	Doctor of Philosophy (PhD) in Molecular Medicine and Haematology/Oncology from School of Medicine.	
	Thesis Title: Proteomics Analysis of Chronic Lymphocytic Leukaemia cells.	
2019 - Present	Certified Consultant Clinical Scientist from Saudi Commission for Health Specialties (SCFHS).	

Molecular Medicine and Haematology/Oncology Related Conferences

(A) Conferences in which I presented my research findings

2009 (1 Day)	Essex University	UK – Colchester
	Title:	Molecular Medicine
	Oral Presentation:	Molecular characterization of the CTLA-4 Expression by Acute Myeloid Leukaemia (AML) Cells
2011 (3 Days)	Welcome Trust	UK – Cambridge
		British Society of Proteomics
	Title:	From Visible to Hidden Proteomics
	Poster Presentation:	Differential Proteome is Associated with CD38 Positive Chronic Lymphocytic Leukaemia (CLL) cells
2012 (4 Days)	Brunel University	UK – London
	Title:	6 th Saudi Scientific International Conference
	Poster Presentation:	Proteomics Based Identification of Differentially Expressed Proteins in Chronic Lymphocytic Leukaemia Cells
2014 (3 Days)	Omics Group	USA – Chicago
	Title:	International Conference of Proteomics and Bioinformatics.
	Poster Presentation:	Proteomics Based Identification of Myosin-9 as a Biomarker of Low-Risk Chronic Lymphocytic Leukaemia (CLL)

2015 (2 Days)	Oxford Global	UK – Manchester
	Title:	10 th Annual Biomarker Congress
	Poster Presentation:	Proteomics-Based Strategies for the Discovery of Biomarkers in Chronic Lymphocytic Leukaemia (CLL)
2015 (1 Day)	Majmaah University	KSA – Alzufli
	Title:	Molecular Medicine
	Oral Presentation:	From Proteomics to the Discovery of Biomarkers and Therapeutic Targets in Cancer
2016 (3 Days)	Sengenics	Brunei
	Title:	Proteomics and Immunomics
	Oral Presentation:	Proteomics of Blood Cancer
2017 (1 Day)	Majmaah University	KSA – Alzufli
	Title:	Cancer Research Day
	Oral Presentation:	Prognosis and Therapy of Blood Cancer: Impact of Transcriptomics, Proteomics and Nano-Particles
2017 (1 Day)	Majmaah University	KSA- Alzufli
	Title:	Asthma Research Day
	Oral Presentation	Immune and Inflammatory Molecules Drive the Progression of Blood Cancer: Possible Link to Asthma

- 2018 (3 days)** **King Faisal Specialist Hospital KSA-Riyadh
and Research Centre**
- Title: Proteins analysis using Mass Spectrometry
- Oral Presentation: Proteomics Quantitation and Proteomics of Blood Cancer
- 2019 (2 days)** **King Fahad Medical City, KSA-Riyadh
College of Medicine**
- Title: Proteomics in Medicine
- Oral Presentation: Proteomics for disease biomarkers discovery

B: Conferences that I attended with no poster or oral presentation

- 2010 (3 Days)** **Welcome Trust UK – Cambridge
British Society of Proteomics**
- Title: From Qualitative Proteomics to Quantitative Proteomics
- 2012 (1 day)** **SOAS University of London UK – London**
- Title: UK CLL Annual Scientific Day
- 2017 (1 Day)** **King Faisal Specialist Hospital KSA-Riyadh
and Research Centre**
- Title: Next Generation Sequencing (NGS) for Clinical application in Oncology

Molecular Medicine and Haematology/Oncology Related Workshops/Training

2010 (3 Days)	Cardiff University	UK – Cardiff
	Title:	Proteomics Analysis
2010 (1 Week)	Cardiff University	UK – Cardiff
	Title:	Proteomics and Bioinformatics
2010 (1 Week)	Welcome Trust	UK – Cambridge
	Title:	Advanced Proteomics and Bioinformatics
2011 (1 Day)	Welcome Trust	UK – Cambridge
	Title:	Quantitative Proteomics
2014 (2 Days)	King Fahd Medical City	KSA – Riyadh
	Title:	Flow-Cytometry for Analysis of Blood Malignancies
2015 (3days)	LI-COR Biosciences	Germany – Homburg
	Title:	Protein and DNA Detection and Quantification Using Near Infrared Licor CLX Technology
2017 (1 day)	King Fahd Specialist Hospital	KSA – Buraydah
	Title:	Testing HER2/ERBB2 Gene Using FISH in Breast Cancer and Non Small Cell Lung Cancer
2018 (2 Day)	BD Biosciences	UEA – Dubai
	Title:	Operator Training on Flow-cytometry (BDFACSCanto II) and the acquisition with analysis software BDFACSDiva v8.0.1

2018 (1 Week)	Agilent Technologies	Germany – Waldbronn
	Title:	Genomics Training: Set up, QC and Analysis of Gene Expression Experiments with the Agilent DNA Microarray and Agilent SureScan Platform
2018 (1 Week)	Agilent Technologies	Germany – Waldbronn
	Title:	Advanced Proteomics Acquisition and Data Analysis with Quantification

Job Experience

2006 – 2007	Almohimeed Hospital	KSA – Buraydah
	Position:	Diagnostic Lab Specialist
2007 – 2013	Majmaah University	KSA – Alzulfi
	Position:	Teacher Assistant in the Department of Medical Laboratories
2014 – 2020	Majmaah University	KSA – Majmaah
	Position:	Assistant Professor of Molecular Medicine and Haematology/Oncology in the Department of Medical Laboratories, College of Applied Medical Sciences.
2020 – Present	Majmaah University	KSA – Majmaah
	Position:	Associate Professor of Molecular Medicine and Haematology/Oncology in the Department of Medical

Laboratories, College of Applied
Medical Sciences.

2013 – 2015	Majmaah University	KSA – Alzulfi
	Position:	Vice-Dean of Quality and Development at College of Science
2015 – 2017	Majmaah University	KSA – Alzulfi
	Position:	Vice-Dean of Postgraduate Studies and Scientific Research at College of Science
2013 – 2018	Majmaah University	KSA – Alzulfi
	Position:	Head of Central Biomedical Science Research Labs (CBRLs).
	Played Roles:	Founder of CBRLs Supervisor and operator of the Proteomics Unit, the Transcriptomics Unit and the Flow-cytometry Facility
2013 – Present	Majmaah University	KSA – Alzulfi
	Position:	Leader of the Molecular Cancer Research Group (MCRG)
	Played Roles:	Founder of MCRG Lead the research team to the discovery of cancer biomarkers and therapeutic targets
2013- present	King Khalid Hospital	KSA – Majmmah
	Position:	Consultant Clinical Scientist in the hospital diagnostic lab.

Played roles: consultation services for the lab tests performed for patients.
Participate in training internship students from Majmaah University

Scientific Research Activity

(A) Establishment of Central Biomedical Sciences Research Labs (CBRLs)

In Majmaah University (2014), I was assigned to establish the Central Biomedical Sciences Research Labs (CBRLs). Therefore, I led a group, consisted of three assistant professors, to establishment the CBRLs that includes four main research labs:

- 1- Molecular Biology and Biochemistry lab
- 2- Microbiology lab
- 3- Histopathology lab
- 4- Experimental Medicine (animal) lab

Since the establishment, I have been working as a head of the CBRLs.

(B) Establishment of the Molecular Cancer Research Group (MCRG)

Following the establishment of the CBRLs, I started the MCRG that I have been leading to conduct scientific research in the field of molecular cancer, in particular blood malignancies. The research group is made of five members and our interest has been focused on studying the molecular basis of blood cancer for the discovery of biomarkers and therapeutic targets.

(C) Publications

My papers can be found in the following:

- 1- My account in Googl Scholar:
<https://scholar.google.com/citations?user=HKZq6VMAAAAJ&hl=ar&oi=ao>
- 2- My ORCID account: <https://orcid.org/0000-0002-2242-5638>
- 3- My Scopus account: <https://www.scopus.com/authid/detail.uri?authorId=56407153000>

(F) List of publication indexed in Web of Science

1. **Alsagaby, S. A.**, Iqbal, D., Ahmad, I., Patel, H., Mir, S. A., Madkhali, Y. A., ... & Al Abdulmonem, W. (2022). In silico investigations identified Butyl Xanalterate to competently target CK2 α (CSNK2A1) for therapy of chronic lymphocytic leukemia. *Scientific Reports*, 12(1):1-21.
2. **S. A. Alsagaby**. Transcriptomics-Based Investigation of Molecular Mechanisms Underlying Apoptosis Induced by ZnO Nanoparticles in Human Diffuse Large B-Cell Lymphoma. *International Journal of Nanomedicine*, 2022;17:2261
3. **S. A. Alsagaby**. Investigating the impact of RNA integrity variation on the transcriptome of human leukemic cells. *3 Biotech*, 2022;12(8):1-12
4. Mir, S. A., Noor, M., Manzar, M. D., Alshehri, B., Alaidarous, M., **S.A., Alsagaby**, ALDosari, S. (2022). Prevalence of rheumatoid arthritis and diagnostic validity of a prediction score, in patients visiting orthopedic clinics in the Madinah region of Saudi Arabia: a retrospective cross-sectional study. *PeerJ*, 10: e14362.
5. AHMAD, M., ALI, S. W., HAMEED, A., AMIR, M., ASHRAF, J., Afzal, M. I., **ALSAGABY S.**, RIAZ, M. (2022). Functional potential of Aloe vera juice against CCl 4 induced hepatotoxicity in animal model. *Food Science and Technology*, 43: e110321.
6. **S. A. Alsagaby**. A comprehensive study on abnormalities associated with red blood cells in Saudi adult patients. *International Journal of Health Sciences*, 2022;16(1):30-41
7. **S. Alsagaby**, A. A. Ahmed, Z. Rasheed, S. A. Althwab, A. S. M. Aljohani, F. A. Alhumaydhi, H. T. Alhomaidan, A. S. Alkhamiss, M. Alkhowailed and A. Alaqeel. Association of genetic polymorphisms in DNA repair genes ERCC2 Asp312Asn (rs1799793), ERCC2 Lys 751 Gln (rs13181), XRCC1 Arg399 Gln (rs25487) and XRCC3 Thr 241Met (rs861539) with the susceptibility of lung cancer in Saudi population. *Nucleosides & Nucleic Acids*, 2022;1-25

(G) Scientific Research -Related Awards

- 1- I was awarded the Key Scientific Article Certificate of 2015 from the Institute of Global Medical Discovery in Canada in recognition of the research article titled “Proteomics-Based Strategies to Identify Proteins Relevant to Chronic Lymphocytic Leukaemia” that was published in the *Journal of Proteome Research*.
- 2- I was awarded the IET Nanobiotechnology Premium Award of 2017 from the Institution of Engineering and Technology in the UK in recognition of

the research article titled “Green synthesis of silver nanoparticles for selective toxicity towards cancer cells” that was published in the Journal of IET Nanobiotechnology.

Skills

(A) Leadership

As a vice-dean of quality and development I worked with the team that prepared the College of Sciences to successfully receive the German academic accreditation ASIIN. Later I was selected to be a vice-dean of postgraduate studies and scientific research in the College where I play leadership roles to create a motivating environment for the faculty members to conduct scientific research. This resulted in number of achievements:

1. Establishment of various research labs; in particular the Central Biomedical Science Research Labs (CBRLs).
2. Creating research groups like the Molecular Cancer Research Group (MCRG) and Infection/Immunity Research Group (IIRG).
3. Organizing Scientific Conferences, such as Molecular Medicine Research Day (2015), Cancer Research Day (2017) and Asthma Research Day (2017).
4. Receiving research grants from funding bodies.

5. Running weekly scientific seminars in the different departments of the college.

(B) Team working

Creating a motivating environment for scientific research was my first priority since I worked in the college as an assistant professor. Achieving this goal required team working as well as leadership skills. For example, beside the leadership roles I played to establish CBRLs I have been working side by side with other assistant professors to develop CBRLs. The development processes passed through series of stages including making a list of required instruments/tools and materials, search for reliable manufacturers and local distributors, supervising instruments installation, receiving training, developing workflows, writing standard operating procedures (SOPs), writing stock inventory and making instrument documentation system for usage and maintenance history.

In addition to my role as a leader of the MCRG, I and other members of the research group employ team-working skills to formulate hypotheses, design projects, write research proposals, conduct lab work, write manuscripts, submit manuscripts to journals and present our findings in conferences.

(C) Communication and Networking

Having good communication skills helped me to communicate well with Arabic and non-Arabic faculty members. This has been essential to encourage the faculty members to apply for research grants and conduct high quality research projects. Employing good networking skills assisted me as a head of CBRLs and leader of MCRG to seek collaboration outside the College. This successfully led to building good relationships/collaborations with different universities, hospitals and research centres like Qassim University, King Fahd Medical City –

Oncology Centre, Prince Sultan Military Medical City – Oncology Department, King Faisal Specialized Hospital Research Centre – Proteomics Unit, King Saud University – Stem Cell Research Centre, and King Abdullah International Medical Research Centre.

(D) Problem Solving

Having Problem solving skills facilitated overcoming many obstacles in the way of developing a nurturing research environment in the College. In the context of CBRLs, I have been heavily participating in solving problems that range from sorting out infrastructure issues to troubleshooting experimental workflow and instrumental performance, in particular proteomics, transcriptomics and flow-cytometry.

Research Interest

I am interested in conducting research concerning molecular medicine and biochemistry of different diseases including cancer, neurodegenerative diseases and microbial infections for discovery of therapeutic targets and biomarkers. Advanced molecular biology approaches like proteomics, transcriptomics, genomics and epigenomics are my first interest that I have been utilizing in my research.
